

Elevate your energy savings with high speed **HF S 562 spindles**

Feature: Min. 17 mm DUI

Benefit: Increased cop content by 2-4 %

Feature: Min. wharve dia. 17 mm

Benefit: Saves energy up to 10%

Feature: Two radial bearings

Benefit: Better load distribution gives stable running even above 30000 rpm

Feature: Double elastic bolster construction with grease between the two housings for additional damping

Benefits:

- Less load on neck-bearing gives longer life
- Reduction in noise level up to 5 dBA

Feature: Dual damping system

Benefit: Very low vibration even at 30000 rpm

Quality • Reliability • Innovation
